A MODEL STORE.

New Quarters of Ballenger the Jeweler-Handsome as the Handsomest.

Those having an eye for the beautiful may do well by a visit to the new head-quarters of Ballenger the Jeweler.

There they will see one of the most attractive places in the city. The most luxurious taste could be satisfied by an inspection of the specimens of the jeweler's art on exhibition. Spacious show cases filled with watches and precious stones, and gold and silver transformed into artistic and pleasing designs greet one upon entering, and added to these are numerous shelves and cabinets upon and in which are tastefully

arranged clocks and bronzes of all patterns, and specimens of art pottery and costly and beautiful silverware.

The whole interior of this truly metropolitan establishment is resplendent with tasteful and ornamental features. The flooring is of Georgia marble tiling. Running the entire length of the Eastern wall the wainscoating, three feet six inches in height is of the same quality of marble, highly polished. Surmounting the wainscoating is a marble shelf filled

with various wares.

When lighted by electricity, furnished by a private dynamo in the basement, the effect is strikingly brilliant.

The place is a model in all of its appointments. It is most creditable to the genial proprietor. But few jewelry stores can boast of as handsome business quarters or of as complete and attractive an assortment of goods in that line. There is no excuse for anyone to run away to larger cities for birthday, wed-ding or Christmas presents. Ballenger can suit anybody if they can be suited at

The First Practical Steamboat.

In 1807, says The St. Louis Republic, Robert Fulton of New York launched the first successful steam propelled boat in America, or in the world, the Clermont. The boat proper was built by Charles Brown in New York; the engine was built in England. Her dimensions were: Length 130 feet; depth 7 feet; breadth 18 feet. Her trial trip was made August 7th, 1807, from New York to Albany, those on board being Fulton's friends, the mechanics and six passengers.

When the steamer left the New York docks it was amid the jeers of the ignorant and the coarse jokes and ridicule of the incredulous. On her way up the Hudson she excited the astonishment of the inhabitants, many of whom had never heard of an engine, much less a steamboat. Some educated excursionists who were camped on the river bank and saw her pass in the night, described her in their letters to friends as "a monster moving on the waters, defying the winds and the tide, breathing sulphurous vapors and snorting flames and smoke." August 7th, 1807, the day she left New York, was a Monday, and she steamed The prospects for a tobacco crop in this section are quite unfavorable. A number of acres have been given up to the weeds.

Notice to Farmers!

At a meeting of the grain merchants and millers of Maysville, held on June 24th, 182, the subject of cleaning wheat by farmers was introduced and fully discussed, and the following preamble and resolution,was adopted:

That whereas, in former years, owing to the superior quality and cleanliness of Mason county wheat, it enjoyed a reputation second to no other section of the evantry and was much sought after, but in recent years, owing to the imperfect cleaning of wheat by threshers, it has suffered very materially in grading in the general markets in comparison with wheat from other states, resulting in no inconsiderable loss to the handlers, and many of the former large wheat customers who bought wheat here have in consequence been

of the former large wheat customers who bought wheat here have in consequence been diverted to other markets: therefore, be it Resolved. That the grain dealers and millers of this gity feel that it is incumbent upon them to make it known to the farmers that they must insist upon them having their wheat well cleaned and screened by threshers, otherwise prices will be made accordingly. They desire to state, for the benefit of the farmers, that wheat to grade No. 2 must weigh at least 58½ pounds to the bushel, thoroughly clean and dry, free from smut and other impurities; and that wheat to grade No. 3 must weigh at least 56 pounds to the bushel, and be dry and reasonably clean, and may have an occasional smut ball, but free from stain. Wheat not up to the above grades will be classed as rejected.
